

Process optimisation

(for injection- or extrusion machine)

Plastics - performance orientated material
and innovative driving force for the
future...

Would you like to economically or technically optimise your injection moulding or extrusion machine? We will be pleased to help you!

Our service:

- Reduction of cycle times
- Surface optimisation
- Troubleshooting
- Identification of problems
- Help in sampling
- Increase in throughput
- Energy reduction
- On-site service (application engineers)
